PROFESSIONAL SUMMARY 2nd-year Electrical and Computer Engineering student at IST, focusing on low-level systems development and security. Balancing rigorous academics with working-student status, demonstrating high resilience and time management. A "Builder" profile with advanced proficiency in C, solid Python skills, and experience in ARM Assembly. Eager to apply automation, network protection, and kernel exploration skills to real-world engineering challenges at scale.

EDUCATION BSc in Electrical and Computer Engineering Instituto Superior Técnico (IST) – University of Lisbon | 2022 – Present

- **Current Status:** 2nd Year (Working Student Status).
- **Relevant Coursework:** Computer Networks (ongoing), Computer Architecture (ARM Assembly), Signals and Systems, Digital Electronics.

TECHNICAL SKILLS

- **Programming Languages:** **C** (Advanced: memory management, pointers, low-level software development), **Assembly ARM** (Direct hardware control, RISC execution flows), **Python** (Automation, scripting), **MATLAB** (Mathematical modeling).
- **Systems & Networks:** Linux Kernel (independent study), TCP/IP, DNS, HTTP/HTTPS, OS Architecture.
- **Engineering Domains:** Low-level hardware-software integration, Physical Modeling, IoT.

TECHNICAL PROJECTS & INDEPENDENT RESEARCH

- **Embedded Systems Architecture:** Exploring hardware-software interfaces to optimize execution performance and system security.
- **ARM Assembly Development:** Implementing routines for peripheral control and analyzing processor-level vulnerabilities (e.g., buffer overflows).
- **Independent Cybersecurity Study:** Continuous research into system vulnerabilities (focusing on memory corruption) and network protection architectures.

INSTITUTIONAL LEADERSHIP Elected Student Representative (Assembly Board & Standing Committee) IST School Assembly | Jan 2025 – Present

- Active participation in the strategic and institutional governance of the university.
- Co-organizer of the IST School Days, coordinating logistics and executing events for the academic community.

PROFESSIONAL EXPERIENCE Mathematics and Physics Tutor Atelier Estudo 4 U (Vila Serena) | Sep 2024 – Present

- Simplifying complex systems for diverse audiences, requiring deep subject mastery and clear communication (vital for effective bug/vulnerability reporting).
- Autonomous schedule and pedagogical management under high-pressure constraints.
